Light rail work update for Randwick from 1 September to 1 December 2018

In planning for Tomorrow’s Sydney, we are building a new light rail line to provide modern, reliable and sustainable public transport that will transform services from Circular Quay and the CBD, to Kingsford and Randwick via Surry Hills, Moore Park and Kensington.

Progress to date

- Track was successfully installed in Alison Road / Dacey Avenue / Anzac Parade intersection over the June long weekend.
- Track installation has been completed in zones 23, 24 and 25, with zone 26 nearing completion.
- Landscaping works have been completed in zone 24 and commenced in zone 25.
- Overhead cable poles are progressively being installed along Alison Road, Wansey Road and High Street.

Over 21,807 metres of track has been laid, with 3,777m of this in Randwick.

8,133 metres of overhead cabling and 179 overhead poles have been installed.

8 of the 60 light rail vehicles have arrived. Night testing and commissioning of these continue along Anzac Parade between Lang Road and Dacey Avenue and Alison Road between Anzac Parade and Darley Road.
Upcoming works – Randwick from the intersection of Anzac Parade and Alison Road to High Cross Park

The following activities will be carried out during construction hours, weather and site condition permitting. Standard construction hours are Monday to Friday between 6am and 6pm, and Saturday between 8am and 5pm.

| Randwick Stabling Yard                             | • Civil finishing works – fencing, gates, landscaping and pavements.  
• Light Rail Vehicle Testing and Commissioning activities.  
• Signalling works                                                                                                                                                                                                                       | • Completion of boundary fencing and gates.  
• Night time Light Rail Vehicle movement on Anzac Parade between Lang Road and Dacey Avenue, and Alison Road between Anzac Parade and Darley Road.                                                                                   |
| Alison Road, between Anzac Parade and Darley Road (Zone 23) | • Intersection work at Alison Road and Anzac Parade  
• Utilities work at the intersection of Anzac Parade and Alison Road – sewer manhole raise  
• Intersection work at Alison Road and Doncaster Avenue  
• Utilities protection and relocation works on Alison Road between Doncaster Avenue and Darley Road – watermain laying and Ausgrid pit adjustments  
• Construction of Royal Randwick Light Rail Stop on Alison Road between Anzac Parade and Darley Road  
• Landscaping work along Alison Road.                                                                                                                                                                                                       | • New traffic lights will be installed on Alison Road near the Randwick Stabling Yard entrance.  
• Upgrade of traffic lights at the intersection of Alison Road and Doncaster Avenue.  
• Royal Randwick Light Rail Stop structures will take their shape. Pedestrian crossing to the stop will be constructed.  
• Footpath construction along Alison Road between Doncaster Avenue and Darley Road.  
• New driveway and pedestrian entrance at the ATC Gate 1.  
• Reconstruction of the busway entrance at Doncaster Avenue.                                                                                                                                                                                  |
| Alison Road, between Darley Road and Wansey Road (Zone 24) | • Intersection work at Alison Road and Darley Road  
• Construction of Wansey Road Light Rail Stop on Alison Road between Darley Road and Wansey Road – includes structural and electrical works                                                                                                                                 | • Footpath upgrade along Alison Road opposite to the Light Rail corridor.  
• Alison Road resurfacing between Darley Road and Prince Street.  
• Street lights upgrade along Alison Road.                                                                                                                                                                                                     |
| Wansey Road, between Alison Road and High Street (Zone 25) | • Civil construction finishing works on Wansey Road                                                                                                                                                                                                                                                  | • Construction and completion of kerb and shared path along Wansey Road.  
• Landscaping and planting of new trees along Wansey Road on ATC side.                                                                                                                                                                           |
| High Street, between Wansey Road and Avoca Street, (Zone 26), including surrounding streets | • Intersection work at High Street and Wansey Road; High Street and Avoca Street; High Street and Botany Street; High Street, Clara and Belmore Road  
• Construction of UNSW High Street                                                                                                                                                                                                           | • High Street stop structures will take their shape.  
• Overhead cables along High Street will be installed.  
• Outages associated with the relocation of utilities will be notified for by the |
Out of hours work will continue from 1 September to 1 December 2018, weather and site condition permitting. Due to high daytime traffic volumes and to ensure pedestrian safety, these works will be completed between 6pm to 6am Sunday to Thursday nights, and from 8am to 5pm Sundays. Out of hours work will take place on a maximum of four nights per week in a particular location, unless otherwise notified.

In some circumstances that construction work has to be taken at night to minimise the traffic impact, and to ensure pedestrian safety.

- Pedestrian diversions will be in place for work being undertaken on footpaths.
- Road occupancy licences for work on live traffic lanes are usually only granted at night, to minimise traffic and access impacts.
- Heavy load deliveries normally take place at night, when traffic volumes are lower.
General information

Traffic and pedestrian changes
For the latest information on traffic changes please visit livetraffic.com or download the Live Traffic NSW app.

Noise and dust
You may experience some noise and vibration during this work. Every effort will be made to reduce the impact to residents and businesses during works.

Noise monitoring will be conducted and, where practical, mitigation measures such as noise blankets will be used to minimise impacts as much as possible. Vehicles will be switched off when not in use to reduce noise. Respite periods will be provided for high noise work, such as saw cutting, jack hammering and rock breaking.

Where required, any dust generating activities will be watered down.

Keeping you informed
Construction of the light rail will continue after this notified period. Periodic updates will be issued as work progresses in your Zone including advanced notification of any night and weekend work.

Please visit sydneylightrail.com.au for all current construction notifications.

Contact information
For general project enquiries, please call 1800 684 490 or email projects@transport.nsw.gov.au.

If you have any urgent enquiries or complaints during this work, please contact the 24-hour Construction Response Line on 1800 775 465.
